This is a marvelous collection of soundtracks. They've been created by Arkadiusz Reikowski and IMGN.PRO!

I will do some pros and cons for the Soundtrack

PROS

- Great composition of songs
- Half of them are tense and the other half is relaxing
- You can listen to them when doing anything really
- Great artists have collaborated with IMGN.PRO to make perfect soundtracks for their game

CONS

- I couldn't find the playlist on Steam Music, so I had to go to the folder where the game was installed and then listen to the whole playlist

I recommend this Soundtrack. I rate it 8/10 would listen to this masterpiece again!. A high-quality and undeniably moody orchestral score, at a perfectly reasonable price. No idea what's up with that cheesy pop ballad near the end, though.

Verdict: 9/10.
